JAMES G. POTEE

+1 (720) 693-3007 | jamespotee@gmail.com | github.com/jmsgnnr

Cloud infrastructure, platforms, security and networking engineer with experience building AWS governance platforms, identity automation, and resilient enterprise infrastructure.

EXPERIENCE

Systems Engineer IV — AWS Cloud Infrastructure | 2023–2026

Charter Communications / The Select Group (Contract) | Remote

- Primary frontend contributor to a production internal AWS management platform, building Next.js/React and TypeScript experiences for account administration, IP address management, role-based access, and identity assignments.
- Engineered cross-account IAM access-key monitoring using AWS Config, STS, Lambda, DynamoDB, SES and scheduled automation.
- Built Python tooling and Django/React interfaces for AWS Identity Center self-service, bulk user/group operations, permission assignments and account access.
- Worked across AWS networking, VPCs, Transit Gateways, Route 53, EKS, infrastructure automation and security governance; collaborated with infrastructure and security stakeholders.
- Supported Terraform, CloudFormation and GitLab CI/CD workflows for repeatable platform and infrastructure changes.

Senior Data Analyst | 2022

Sagence Inc. (Contract) | Chicago, IL

- Developed SQL and Oracle Data Integrator (ODI) transformation pipelines to consolidate legacy data for enterprise reporting.
- Supported data warehouse design, AWS-hosted data migrations and requirements translation for business stakeholders.

Software Engineer | 2021–2022

On Beat Digital | Fort Collins, CO

- Built responsive web applications and marketing/analytics interfaces.
- Developed AWS Lambda and S3 workflows and Python integrations for processing external API data into operational reports.

SELECTED PLATFORM & AUTOMATION WORK

- Internal AWS management platform: Next.js, React, TypeScript, AWS SDK, identity federation and governance workflows.
- Cloud security automation: IAM access-key monitoring, AWS account discovery, cross-account access and notifications.
- Identity self-service: AWS Identity Center, Python, Django/React, validation and dry-run safeguards.

TECHNICAL SKILLS

Infrastructure & networking: AWS, EC2, EKS, VPC, Transit Gateway, VPC peering, Route 53, RDS, CIDR, routing, DNS

Security & identity: IAM, Identity Center, AWS Organizations, AWS Config, CloudTrail, KMS, RBAC, SSO, Keycloak, access governance

Automation & delivery: Python, boto3, PowerShell, Terraform, CloudFormation, GitLab CI/CD, Docker, Kubernetes, Helm

Development & data: React, Next.js, TypeScript, REST APIs, SQL, PostgreSQL, DynamoDB

Observability: CloudWatch, Datadog, centralized logging

EDUCATION

Software Engineering Immersive | General Assembly | 2020–2021 | Top of Class Honors

COMMUNITY

STEM Mentor | Latinos In Tech Early Career Development Program | 2023–Present
